

Goodman Fielder is one of Australasia's leading manufacturers of pies and smallgoods.

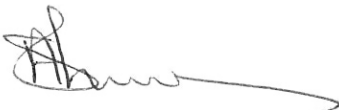

We recently launched the Georgie Pie line for McDonalds at our Wiri plant in Auckland and looked to the experts at Spraying Systems Co.® New Zealand for an automated spray solution.

After having an engineer visit and inspect our plant, Spraying Systems Co. New Zealand recommended the AutoJet® Glaze Spray System which uses Precision Spray Control (PSC) to evenly coat the pies whilst reducing excess glaze use. Since installing the system, we have seen an improvement in the overall quality of our pies as well as an increase in production and reduced clean-up time.

We have been dealing with Spraying Systems Co. New Zealand for a long time and they have never failed to offer help and support to our plant. In addition to the AutoJet Glaze Spray System, the spray nozzles that have been supplied to us on previous occasions are of excellent quality and have offered trouble free performance.

We look forward to working with Spraying Systems Co. New Zealand in the future.

Regards,

Shiva Arulambalam
